CALL FOR PAPERS
The 24th International Conference on Advanced Information Systems Engineering
(CAiSE’2012)
25-29 June 2012, Gdańsk (Poland)
http://www.caise2012.univ.gda.pl

Information Services

The special theme of the 24th edition of CAiSE is Information Services. The notion of service plays a more and more extensive role in the enterprise development. Indeed, most of the enterprise management and manufacture is based on the exchange of services: services to the customers and/or citizens, services to support the inter-organisational collaboration as well as services to accomplish intra-organisational activities. Many organizations and companies are sharing services with others, interfacing services from others, or outsourcing their ICT resources to various locations worldwide aided by the internet. For all of them, the concept of service becomes a cornerstone of their processes of collaboration, innovation and value creation.

In this context, the information systems (IS) engineering is moving towards the adoption of service-driven architectures where intra- and inter-organisational business activities are carried out with the help of information services. Information services are considered as a new means to deal with the complexity, modularity and interoperability of the constantly growing IS. Design and development of information services and information service-driven architectures become key to the success of organisations and their business.

Therefore, the service-driven IS domain becomes a new complex domain, which requires new interdisciplinary approaches and new transdisciplinary ways of thinking.

Topics of interest include, but are not restricted to:

Methodologies and Approaches for IS Engineering
- Enterprise architecture and enterprise modelling
- Service science
- Requirements engineering
- Business process modelling and management
- Model, component, and software reuse
- IS reengineering
- Adaptive IS engineering approaches
- Knowledge patterns and ontologies for IS engineering
- IS engineering approaches for adaptive and flexible information systems
- IS in networked & virtual organizations
- Method engineering
- Knowledge, information, and data quality
- Quality of models and of modelling languages

Innovative platforms, architectures and technologies for IS engineering
- Service-oriented architecture
- Model-driven architecture
- Component based development
- Agent architecture
- Distributed, mobile, and open architecture
- Innovative database technology
- Semantic web
- IS and ubiquitous technologies
- Adaptive and context-aware IS

Engineering of specific kinds of IS
- eGovernment
- Enterprise applications (ERP, CRM)
- Data warehousing and business intelligence
- Workflow systems
- Knowledge management systems
- Content management systems
- Sustainability-aware IS

Important Dates:
20 October 2011: Workshop submission deadline
30 November 2011: Paper submission deadline
16 December 2011: Tutorial submission deadline
17 February 2012: Notification of acceptance
25-29 June 2012: Conference, Workshops & Related Events
Types of contributions. We invite four types of original and scientific papers:

- **Formal and/or technical papers** describe original solutions (theoretical, methodological or conceptual) in the field of IS engineering. A technical paper should clearly describe the situation or problem tackled, the relevant state of the art, the position or solution suggested and the potential - or, even better, the evaluated - benefits of the contribution.

- **Empirical evaluation papers** evaluate existing problem situations or validate proposed solutions with scientific means, i.e. by empirical studies, experiments, case studies, simulations, formal analyses, mathematical proofs, etc. Scientific reflection on problems and practices in industry also falls into this category. The topic of the evaluation presented in the paper as well as its causal or logical properties must be clearly stated. The research method must be sound and appropriate.

- **Experience papers** present problems or challenges encountered in practice, relate success and failure stories, or report on industrial practice. The focus is on 'what' and on lessons learned, not on an in-depth analysis of 'why'. The practice must be clearly described and its context must be given. Readers should be able to draw conclusions for their own practice.

- **Exploratory papers** can describe completely new research positions or approaches, in order to face to a generic situation arising because of new ICT tools or new kinds of activities or new IS challenges. They must describe precisely the situation and demonstrate how current methods, tools, ways of reasoning, or meta-models are inadequate. They must rigorously present their approach and demonstrate its pertinence and correctness to addressing the identified situation.

**Submission Conditions:** Papers should be submitted in PDF format. The results described must be unpublished and must not be under review elsewhere. Submissions must conform to Springer's LNCS format and should not exceed 15 pages, including all text, figures, references and appendices. Submissions not conforming to the LNCS format, exceeding 15 pages, or being obviously out of the scope of the conference, will be rejected without review. Information about the Springer LNCS format can be found at http://www.springer.de/comp/lncs/authors.html. Three to five keywords characterising the paper should be indicated at the end of the abstract. The type of paper (technical/empirical evaluation/experience/exploratory paper) should be indicated in the submission.

**Publication:** Accepted papers will be presented at CAiSE’12 and published in the conference proceedings, which are published in the Springer Lecture Notes in Computer Science (LNCS).

**Steering Committee**
Barbara Pernici, Politecnico di Milano, Italy
Oscar Pastor, Technical Univ. of Valencia, Spain
John Krogstie, Norwegian Univ. of Science and Technology, Norway

**Advisory Committee**
Arne Solvberg, Norwegian Univ. of Science and Technology, Norway
Janis Bubenko Jr, Royal Institute of Technology, Sweden
Colette Rolland, Univ. of Paris I Panthéon-Sorbonne, France

**General Chair**
Sjaak Brinkkemper, Utrecht Univ., The Netherlands

**Program Chairs**
Jolita Ralyté, Univ. of Geneva, Switzerland
Xavier Franch, Universitat Politècnica de Catalunya, Spain

**Organising Chair**
Stanislaw Wrycza, Univ. of Gdansk, Poland

**Workshops Chairs**
Marco Bajec, University of Ljubljana, Slovenia
Johann Eder, Alpen Adria Univ., Austria

**Tutorial Chairs**
Ana Moreira, Univ. Nova de Lisboa, Portugal
Raimundas Matulevičius, Univ. of Tartu, Estonia

**Forum Chairs**
Marite Kirikova, Riga Technical Univ., Latvia
Janis Stima, Stockholm University, Sweden

**Industry Chair**
Erik Proper, CRP Henri Tudor, Luxembourg

**Doctoral Consortium Chairs**
Isabelle Mirbel, University of Nice, France
Barbara Pernici, Politecnico di Milano, Italy

**Publication Chair**
Claudia P. Ayala, Universitat Politècnica de Catalunya, Spain

**Tutorial Chairs**
Ana Moreira, Univ. Nova de Lisboa, Portugal
Raimundas Matulevičius, Univ. of Tartu, Estonia

**Forum Chairs**
Marite Kirikova, Riga Technical Univ., Latvia
Janis Stima, Stockholm University, Sweden

**Industry Chair**
Erik Proper, CRP Henri Tudor, Luxembourg

**Doctoral Consortium Chairs**
Isabelle Mirbel, University of Nice, France
Barbara Pernici, Politecnico di Milano, Italy

**Publication Chair**
Claudia P. Ayala, Universitat Politècnica de Catalunya, Spain

**Publicity Chairs**
Rebecca Deneckère, Univ. of Paris 1 Panthéon-Sorbonne, France
Carina Alvés, UFPE, Recife, Brasil
Marta Indulska, Univ. of Queensland, Australia
Lin Liu, Tsinghua Univ., China
Keng Siau, Univ. of Nebraska-Lincoln, USA
